

TAYYBA ABID

AI & Full-Stack Developer | Generative AI | RAG Systems | LangChain
0322-0685063 • tayybadogar4@gmail.com • [LinkedIn](#) • [Portfolio](#)

Software Engineering student specializing in full-stack AI development and Generative AI applications. Built and deployed AI Learning Suite, Multi-Bot Chat System, and Smart PDF Chat using RAG architecture, LangChain, and large language models (LLMs). Proficient in Python, FastAPI, vector databases (FAISS, Pinecone), and REST API development. Experienced in end-to-end AI system deployment and WordPress web development for client projects.

AI DEVELOPMENT EXPERIENCE

AI Developer | Personal & Academic Projects

2024 – Present

- Designed and deployed a multi-application AI tutoring platform ([Code Mentor AI](#) + [Quiz Generator](#)) backed by shared FastAPI endpoints, reducing backend duplication by centralizing LLM orchestration across both products.
- Built an adaptive Code Mentor AI that classifies user proficiency (beginner / intermediate / advanced) via multi-turn LLM inference and dynamically scales response depth, with file upload support for context-aware Q&A.
- Engineered an auto-quiz generation pipeline that triggers every 6 queries, producing a formatted Word document quiz with answer key — streamlining instructor assessment workflows.
- Developed a SaaS-style [Multi-Bot Chat](#) platform inspired by Chatbase, enabling multiple users to upload proprietary documents and spin up isolated, document-scoped chatbots with zero cross-contamination between sessions.
- Implemented per-user, per-bot vector store isolation using FAISS and Pinecone, ensuring complete data privacy and session separation across concurrent users.
- Built an end-to-end RAG pipeline ([Smart PDF Chat](#)) enabling users to query PDF content with AI-generated answers strictly grounded in source documents, eliminating out-of-scope hallucinations.

WEB DEVELOPMENT EXPERIENCE

WordPress Developer | Freelance

2023 – 2024

- Delivered 3 production websites: [POLOPOINT](#) (corporate site), Al-Rafiq Mart (e-commerce with WooCommerce), and [Connect Intermodal](#) (logistics platform) — all responsive and cross-device compatible.
- Built custom UI layouts using Bootstrap and Tailwind CSS; optimized page load performance and mobile responsiveness across all client deliverables.

KEY PROJECTS

AI Learning Suite (FYP) — FastAPI, LangChain, RAG, Vector Databases, PyMuPDF, python-docx, Streamlit

Multi-Bot Chat Base System — FastAPI, LangChain, RAG, Pinecone, Python

Smart PDF Chat (RAG) — Lang Chain, Streamlit, FAISS, Python

TECHNICAL SKILLS

Generative AI & LLMs: LangChain, RAG Architecture, Prompt Engineering, Fine-Tuning, Hugging Face Transformers, FAISS, Pinecone, Chatbot Development

Backend & Web: FastAPI, Django, Streamlit, REST APIs, Microservices, WordPress, WooCommerce, Bootstrap, Tailwind CSS

Languages: Python, JavaScript, SQL, R, C++, HTML/CSS

NLP & Parsing: Text Classification, Sentiment Analysis, PyMuPDF, python-docx, python-pptx

DevOps & Tools: Docker, Git & GitHub, Jupyter Notebook, Google Colab, VS Code, Hugging Face Hub

EDUCATION

BS in Software Engineering — COMSATS University Islamabad

2022 – 2026

CGPA: 3.53 / 4.00 | Relevant Coursework: Artificial Intelligence, Computer Vision, Data Science, Database Systems, Software Architecture, Web Engineering
